

ENVIRONMENTAL AMINE ANALYSIS

Quantum Specialist will monitor printing environment for:

- **TEMPERATURE**
- **RELATIVE HUMIDITY**
- **AIRFLOW**
- **EVAPORATION RATE OF WATER AND SEVERAL APPLICABLE AMINES**
- **HEAT POINTS THROUGHOUT FACILITY**
- **EQUIPMENT**

From this data collection a report will be generated explaining the printing environment and detailed instructions on maintaining pH within the facility and equipment. Also, a specified pH blend will be suggested for use considering data collected. This is a non-disruptive practice that can be done accurately without hindering the regular day work flow.
